Wild Cherry has long been known to possess important medical properties. This fact is fami-liar to every matron in our land, and physicians often prescribe it in different forms for a variety of complaints. Tar, also, has been equally noted for its virtues; and some physicians, whose names are familiar to the whole country, have gone so far as to declare that even CONSUMP-Tion could be cured by that alone. In other nands, again, it was nearly valueless, owing, no doubt, to their ignorance in preparing and adninistering it-a difficulty now entirely obviated

Greeley's Travels in Europe

CLANCES AT EUROPE: In series of let-ters from Great Britain, France, Italy, &c.— By HORACE GREELY, Octavo, Cloth, Price By HORACE GREELY, Octavo, Cloth, Price One Dollar This volume comprises the observations made during Mr. Greekey's recent European tour, on Society, Manners and Customs, Art, Literature, Agriculture, Foreign Politics, and a great variety of other attractive and

exciting topics.

It has copious notices of the Great Exhibition or World's Fair in London; complete descriptions of the Cultivation of the Soil in different countries; brilliant criticisms of the Works of Art in Rome, &c., written in the frank, straightforward piquant style, for which Mr. Greely is widely celebrated.

A more authentic, instructive, and amusing Book of Travels has probably never been issued from the American press. The vast amount of information which it contains is presented in such

such frequent flashes of humor, and pervaded with each genial and sparkling vivacity, that no one who commences the volume can lay it down without finishing its perusal.

We confidently anticipate a very extensive cirbuiltion for this work throughout the United States. The name of Horace Greely, which is as widely known as that of any other American cirizen, will excite a general curiosity to learn the results of his European experience. We are certain that no one can be disappointed in this admirable recital of his foreign adventures.

THE ARCHITECT, SERIES OF GRIGINAL DESIGNS, for A SERIES OF ORIGINAL DESIGNS, for A Domestic and Ornamental Cottages, conneted with Landscape Gardening, adapted to the Ulted States; Illustrated by Drawings of Gound Plans, Perspective Views; Elevations, Stitons, and Details, by William H. Ranlett, Ardtect, Published in twenty numbers, price 50 dats per No., making two volumes royal quarto, lice \$12.

The architect is a work admirably calculated for those who are engaged in building, whether for ornament or useful purposes.—Evening Express.

Its practical utility cannot be doubted by any who will take the trouble to examine its contents. The full specifications and estimates of building accompanying each plan, can be relied on with implicit confidence.—Farmer and Mechanic.

This work has passed through its first volume with steadily increasing popularity. In a young country like ours, the publication of original designs for domestic and ornamental cottages, connected with landscape gardening, adapted to the climate, is calculated to have an important influence upon the style of architecture in public as well as in private edifices. Such a publication we have in the architect.—Morning Star.

The specifications and estimates are so minutely and clearly made out, the drawings are so full; and the directions so exact, that any gentleman wanting to build may be his own architect and "clerk of the work;" provided he adopts any of the admirable designs in Mr. Kanlett's work,—Times, and Messenger.

We could multiply notices, ad infinitum, but the above will suffice. It is believed that no work ever published either in Europe or this country, of its size, has ever had a more extensive sale or more generally appreciated.

It contains many plans and specifications of or-

of its size, has ever had a more extensive sale or more generally appreciated.

It contains many plans and specifications of ornamental cottages, suitable to every class and narse, with estimates of the cost; thus saving the expense of an architect. It is intended through the Architect, to combine elegance with utility and to cultivate a refined taste, at moderate expense both in and around the dwellings of our citizens. We can commend them without qualification to the attention of gentlemen looking for plans for the neatest of all country residences, the cottage. Mr. Ranieti, the anthor of the designs in the Architect, may have the satisfaction of knowing that he is contributing to refine and elevate the inste of his countrymen.—Tribuse.

With the information here afforded, one can at a glance ascertain the cost of any style, of cottage that strikes his fancy; without the expense of from thirty to a hundred dollars usually paid for architectural drawings; for to these designs are Isoa added full descriptions, with specifications and estimates of the materials and labor. The execution of these numbers, both lithographic and typegraphic, is excellent, and the paper fine, rendering them ornaments for drawing-rooms.
